<b>Office Action Summary</b>	<b>Application No.</b> 10/684,923	<b>Applicant(s)</b> WILLIAMS, DOUGLAS	
	<b>Examiner</b> Gary K. Graham	<b>Art Unit</b> 1744	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Applicant's election of Group I, claims 1-7 in the reply filed on 18 December 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Aronson (US patent 1,937,005).

The patent to Aronson discloses the invention as is claimed, including a brush (fig.2) having a tuft of bristles (17), a ferrule (11,16) attached to the tuft and a transparent brush handle (10) attached to the ferrule. The handle has a main cylindrical chamber therein which is separated by vane (30) into a pair of segments extending the full length of the chamber. A colored material (soap) is contained within the chamber and visible through the transparent handle.

Art Unit: 1744

With respect to claim 5, note rod or shaft (21) which is provided within the chamber and is shown in cross section by the hatching as not being transparent. Thus, such is considered as a colored rod inserted into the chamber.

Claims 1, 4, 5 and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Jang (US patent application publication 2003/0150073).

The publication to Jang discloses the invention as is claimed, including a brush (fig.2) having a tuft of bristles (40), a ferrule (30) attached to the tuft and a transparent brush handle (20) attached to the ferrule. The handle has a cylindrical chamber therein into which a colored resin rod (21) is inserted.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jang (US patent application publication 2003/0150073).

The publication of Jang discloses all of the above recited subject matter with the exception of there being multiple chambers with rods therein and the chamber being helical in shape.

Art Unit: 1744

While Jang disclose a single chamber with a single rod therein, to change the shape and number of rods does not appear patentably significant or anything more than one of numerous configurations a person of ordinary skill in the art would find obvious for the purpose of providing a decorative insert within a transparent handle. Such appears to relate purely to the visual appearance of the handle and does not appear to patentably distinguish from Jang. Given the teachings of Jang, one of skill in the art would, by routine experimentation, find the most visually appealing arrangement of the rod within the handle, lacking some criticality of such an arrangement.

### *Conclusion*

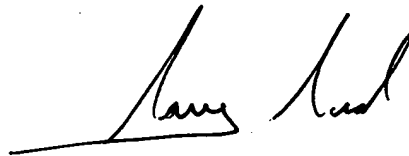

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
